

Zug: pharma/biotech cluster

For decades, the life sciences cluster has been a major industry in the Canton of Zug. Roughly half of those working in life sciences are employed in the pharmaceutical and biotechnology industry, while the other half works in the medical device industry. The Canton of Zug is home to numerous international pharma/biotech companies. They benefit from the excellent business environment, the high availability of talents and from Zug's central location in the heart of Europe.

Johnson & Johnson (J&J) started in Zug in 1984 with only 5 people. Today we employ around 1,000 people, representing the 3 sectors in which J&J is operating (Pharma, Medical Devices, Consumer), with Global, Regional and Local responsibilities. Business friendliness, availability of highly qualified talents, modern infrastructure, proximity to the airport and the business ecosystem, with a high concentration of companies, make Zug the ideal location for Johnson & Johnson business. **Andrea Ostinelli, Managing Director Cilag GmbH International, Chair of the Johnson & Johnson Switzerland Leadership Team**

Pharma/Biotech in Switzerland

The pharma/biotech sector accounts for around 29 billion Swiss francs in revenue, equaling some 4% of Swiss GDP and a third of total exports. Around 45,000 full-time employees work in the pharma/biotech sector, accounting for approximately 1% of the total Swiss workforce. The added value created in adjacent sectors underscores pharma/biotech's importance for Switzerland's economy. With these sectors included, the total workforce is nearly 180,000 FTEs, generating almost 44 billion Swiss francs in revenue.

Research location Greater Zurich Area (GZA)

The GZA is well-known as a prime location for pharma/biotech companies. Their presence and the high density of universities, in particular the renowned Swiss Federal Institute of Technology Zurich (ETHZ) and Zurich University (UZH), make the GZA a vibrant cluster with a highly skilled workforce.

The Canton of Zug an international hotspot

Zug is home to many global players, and numerous small and medium-sized companies have also set up regional and international headquarters here. Main activities include general management, commercialization, market access, R&D, IP, supply chain management. The high density of pharma/biotech companies in the canton and the large number of service providers dedicated to the life sciences cluster make for a beneficial business environment.

Countless independent ratings and studies affirm the Canton of Zug's popularity as a unique area for business and living. Zug offers the highest level of political and financial stability, with a track record spanning many decades.

Courtesy of Bristol-Myers Squibb

Agios is focused on discovering and developing novel investigational medicines to treat cancer and rare genetic diseases through scientific leadership in the field of cellular metabolism and adjacent areas of biology. To best position Agios for future product launches, we recently selected Zug as our International Headquarters due to the wealth of life science innovation and the talented workforce in the region. The centrality in Europe, great infrastructure, outstanding quality of life and great support from the local authorities were also other key factors for us to choose this location.

Orlando Oliveira, Senior Vice President & General Manager, International, Agios
